COMAND®
TOPDRESS

TAKE COMAND® OF YOUR SOIL HEALTH

COMAND TopDress is a 1/4-inch-minus single-source organic top dressing rich in humic acid and microbes. Specifically designed for fairways, tee boxes, bunker faces and sports turf, it strengthens resilience and improves stress recovery—also ideal for residential and commercial lawns. Ask us how COMAND can support healthier turf and faster recovery.

"In my 37 years in the landscape turf industry, I've seen countless products promise better water retention. COMAND is the first one where everyone I've done a job for has been genuinely amazed by the results."

—JOSH WASDEN, J.S.J. UNLIMITED

STRENGTHEN TURF RESILIENCE
Organic matter and microbes improve soil health, making turf more resistant to stress from foot traffic, extreme weather, and seasonal maintenance activity cycles.

SEAMLESS INTEGRATION
Fine particles settle evenly into the canopy, enhancing aeration, nutrient retention, and playability while integrating smoothly with existing turf for uniform coverage.

IMPROVE WATER RETENTION
Quickly reaches the root zone to hold moisture longer, reducing irrigation needs while ensuring even hydration, preventing dry spots, and improving drought tolerance in stressed turf.

PERFECT FOR ALL LAWNS
Designed for fairways, tee boxes, and high-use areas, it is also ideal for residential and commercial lawns in need of improved soil health and sustained turf resilience.

ACCELERATE STRESS RECOVERY
Helps turf recover faster from wear, thinning, and compaction by supporting microbial activity, improving root mass, and increasing nutrient availability in weakened areas.

STA CERTIFIED
Pathogen-free, weed-free, and rich in stabilized organic matter, ensuring safe, consistent results in professional turf care and high-performance lawn applications.

Availability	
	PILLOW BAG 1.5 CF
	SUPER SACK 1 CY and 1.8 CY
	BULK TRUCK By the yard
